Staff training on prevention of sexual violence
What is the aim of the stop · sv project?

The general objective of the stop · sv project is to create a dynamic of intertwined actions oriented to:
— Explore and appraise the conditions that facilitate and/or promote sexual harassment (SH) and sexual violence (SV) in night-time environments
— Create a system to deconstruct these conditions and foster change
— Socialize both the problem and the solutions by engaging the strategic stakeholders (NTE, public administrations and civil society)

How does the project intend to do so?

In each pilot site, a local multi-sectorial coalition will be established to explore the topic and engage key agents. A training manual module for preventing and managing SH/SV in nightlife environments will be produced, as well as protocols focusing on key principles that should be followed to protect victims, preserve evidence and share intelligence for future prevention. Trainings will be conducted in all pilot sites, and an evaluation undertaken to assess the research, components of the programme, training methodology and community coalitions' performance to appraise changes in prevention in management of the NTE. A final conference to share knowledge, best practice and lessons learned to foster changes in nightlife environments, will be held in 2019 and the training manual presented for adoption among key stakeholders.
